

# Menu permissions

Menu Permissions is the module responsible for assigning permissions to the portal menu options.

The screenshot shows a two-panel interface. The left panel, titled "Menus", contains a search bar and four menu items: "Organization" (ORGANIZATION), "Parameters" (SETTING\_PARAMETERS), "Services" (SETTING\_SERVICE), and "My Company" (SETTING\_MY\_COMPANY). The right panel, titled "Permissions - MENU (1/5)", contains a search bar and a list of permissions: "List (LIST)" (checked), "Insert (INSERT)", "Edit (EDIT)", "Delete (DELETE)", and "Edit Test Date after completed status (EDIT\_TEST\_DATE\_AFTER\_COMPLETED\_STATUS)". A "SAVE CHANGES" button is located at the bottom of the right panel.

Using the **Search** Menus field, you can search for the menu option to which you want to assign permissions.

The screenshot shows the "Menus" panel with a search bar containing the text "servi". Below the search bar, a dropdown menu is open, showing the "Services" menu item with the code "SETTING\_SERVICE".

Select the menu option and, in the right-hand panel, check the box for the **permissions** you want to assign.

Finally, click **Save Changes** to save the configuration.
